2006 Duck Season Opener

This year the first Saturday in October falls on the 7th. If Wisconsin opens the duck-hunting season on this date, there is a good chance that the early ducks will have already passed through Wisconsin, especial Blue Winged Teal. A better option may be to open the season on the Saturday closest to October 1st, September 30th. If a later closure is desired the October split could be lengthened.

Therefore be it resolved that the attendees of the Vernon Co. Wisconsin Conservation Spring Hearing, ask that the Migratory Committee of the WCC to support this position.
